5. Combo 3.5m Mini Jack connector

## 4

### **Shark Receptor H70 wired gaming headset**

Shark Gaming Systems

v1.0

#### **Setup**

1. Connect microphone to headset.
2. Connect via either the included 3.5 mini jack or USB-C cable  
Use the Y-splitter cable if the output device doesn't support combo mini jack output.  
USB-C connection required for virtual 7.1 sound and software control.
3. Install optional software

#### **Headset controls**

##### Microphone mute toggle

- Microphone is active when toggle is in the inwards position
- Microphone is muted in the raised position

##### Volume wheel

- Rotate up for volume up
- Rotate down for volume down, turning wheel to furthers downward position mutes the headset sound.

**Replacing/swapping the included ear cups.**

1. Pull from the topside between fabric/PU and plastic holder, then start pulling clockwise until earcup is loose.
2. Choose the fabric or PU earcup to place in.
3. Align the plastic connectors to the input holes
4. Push in from the bottom then upwards on the side areas until earcup is attached
5. Repeat above steps for 2. Earcup

**Troubleshoot**

1. No sound in headset
  - a. Check if cables are firmly connected on headset, and output device
  - b. Check if volume wheel has been turned up.
2. No Voice output.
  - a. Check if microphone connection is firmly attached in the correct orientation.
  - b. Check if the microphone mute toggle is on.
3. Device not connected to software.
  - a. It is recommended to use the included USB-A to USB-C cable.
  - b. Check if the cable is connected firmly on both input and output connections
